

### **AMENDMENTS TO THE CLAIMS**

Claim 1 (Currently Amended): A remedy ~~with phagocytic activity of macrophages being facilitated by the incorporation into macrophages~~ of a particle formulation of PLGA [poly(lactic acid/glycolic acid) copolymer] ,with particle diameters of 1 to 6µm, containing a medicament, wherein

the particle formulation of a PLGA contains rifampicin;

the molecular weights of PLGA are between 5,000 to 10,000; and

the ratio of PLGA lactic acid to glycolic acid is 50:50 to 75:25; ~~and~~

whereby phagocytic activity of macrophages being facilitated by the incorporation into macrophages and all or part of the pathogens present in the macrophages are exterminated to vanish.

Claim 2 - 11 (Canceled)

Claim 12 (Currently Amended): The remedy according to Claim 1, further comprising at least one of PVA (polyvinyl alcohol), PEG (polyethyleneglycol), ~~PEO (polyethylene oxide),~~ sugar, protein, peptide, phospholipids or cholesterol.

Claim 13 - 15 (Canceled)

Claim 16 (Previously Presented): The remedy according to Claim 1, fabricated by membrane emulsification method.

Claim 17 - 18 (Canceled)
